

DDH AGGRESSIVE GROWTH FUND

The DDH Aggressive Growth Fund invests primarily in growth assets, mainly listed international and Australian shares. The Fund gives investors access to wholesale portfolios managed by QIC, one of Australia's leading fund managers.

OBJECTIVE

The Fund aims to provide long-term capital growth by investing in a diversified portfolio of Australian and global shares, which it achieves through investment in the Underlying Funds.

STRATEGY

Through investment in a combination of the Underlying Funds, the Fund's benchmark asset allocation is 100% invested in growth assets (shares), subject to limited allocations to cash and foreign currency, as described below. Allocations between the Underlying Funds are reviewed regularly although a reallocation is only considered in response to a fundamental change in long-term expectations or market demand. QIC seeks to add value through a disciplined approach to the selection of the investments held by the Underlying Funds. For risk management purposes, some of the Underlying Funds may hedge some of their currency exposure.

QIC AS INVESTMENT MANAGER

DDH has appointed QIC Limited ACN 130 539 123 (QIC) as the Fund's wholesale investment manager. As one of Australia's largest wholesale fund managers QIC has extensive experience and capability in institutional investing. QIC's structure and backing is unique amongst institutional investment managers while the expertise and conviction of its investment teams contribute to produce consistently above-average returns. For further information on QIC, please refer to their website: www.qic.com.

FEATURES

Flexibility

Open to both direct investors and indirect investors, who can invest in the Fund via Australian Money Market.

High Risk/Return

The potential for higher returns than lower risk investments, however there is the higher potential for below-average returns and/or some loss of capital.

This may suit buy and hold investors seeking long-term capital growth, some income, and with a higher tolerance for the risks associated with market volatility.

Suggested Minimum Time Frame	7 Years

* Fund returns are net of trust administration fees, applicable external management fees and all underlying fund expenses but gross of QIC management and any applicable performance fees which are charged outside the Fund.

** Inception date was 10 July 2002. In September 2011, the Fund changed its name from Implemented Australian Equities Fund and its investment objective from targeting a return of 2% above S&P/ASX200 via active management.

- **The QIC Diversified Australian Equities Fund returned -2.20% over the month and 0.13% over the quarter and the financial year to date (FYTD)**
- **The Australian equity market returned -1.85% over the month and 1.71% over the quarter and the FYTD**
- **The Fund underperformed its benchmark over the quarter, driven by underperformance in both the multifactor and value strategies**

Performance

The QIC Diversified Australian Equities Fund (the Fund) returned -2.20% over the month and 0.13% over the quarter and the financial year to date (FYTD). The Fund underperformed relative to its benchmark over the quarter, with the S&P/ASX 200 Accumulation Index (ASX 200) returning 1.71%.

Contributors to performance relative to the benchmark over the quarter:

- Within the value strategy, an overweight allocation to the energy sector contributed to performance

Detractors from performance relative to the benchmark over the quarter:

- The multifactor strategy underperformed, weighed down by stock selection within the materials and industrials sectors
- The value strategy overall underperformed, weighed down by an overweight allocation to the materials sector and stock selection within the consumer discretionary sector

Market Review

The Australian equity market outperformed major international markets over the quarter. The ASX 200 returned 1.71% with mixed sector performance. Energy (+9.27%), industrials (+6.70%) and utilities (+5.14%) performed the best, while materials (-9.87%), health care (-2.74%) and consumer discretionary (-2.59%) underperformed.

Global equity markets finished the September quarter marginally lower. Positive performance was seen at the start of the quarter resulting from increased vaccination rates and strong corporate earnings releases. This performance was later reversed on the back of rising interest rates due to concerns regarding increasing inflation. Developed markets (+0.58%) outperformed relative to emerging markets (-6.69%) over the quarter.

¹Benchmark is the S&P/ASX 200 Accumulation Index.

Past performance is not a reliable indicator of future performance.

Forecast results are predictions only and may differ materially from results ultimately achieved.

Within developed markets, the UK (+2.15%) outperformed, while the US (+0.31%) underperformed and Europe (+0.54%) performed in line.

Commodities had mixed results over the quarter: notably iron ore prices fell significantly, and aluminium prices increased. The Australian dollar depreciated on a trade weighted basis.

Fund Positioning

The Fund targets combinations of risk and behavioural based factors. The Fund currently has a tilt towards value, momentum, low beta and quality equities which is consistent with our desire to capture the long-term positive expected returns associated with these exposures. Relative to its benchmark, the Fund is most overweight in the materials, financials and communication services sectors and most underweight in the industrials, information technology, and healthcare sectors.
